SUMMARY

Computer Science graduate with a strong foundation in Internet Computing and software development. Skilled in problem-solving, teamwork, and communication. A fast learner who is passionate about building efficient and user-friendly applications, seeking an opportunity to grow and contribute as a developer.

EDUCATION

Universiti Sultan Zainal Abidin Bachelor of Computer Science (Internet Computing) with Honours Current Semester: Semester 5 Current GPA: 3.84 (Dean's List: Sem 2, 3, 4) Focus Areas: • Web Development • Programming & Systems	Oct 2023 - Present
Kolej Matrikulasi Pulau Pinang Jurusan Sains (Sains Komputer) PNGK: 3.29 Focus Areas: • Basic Programming • Problem Solving & Algorithms • Computer Systems Fundamentals • Mathematical Foundations	2021 - 2023

SKILLS

Frontend (Intermediate) HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS
Backend (Intermediate) Laravel, CodeIgniter 4, Node.js, Authentication & Authorization, CRUD Operations, REST API Integration
Database (Intermediate) MySQL, Supabase, Firebase
Deployment & Hosting (Basic – Intermediate) Render, Vercel, Netlify
Programming & Data (Basic) Python, Pandas, Data Analysis
Development Tools (Intermediate) Git, GitHub, Docker, GitHub Actions (Basic CI/CD), Visual Studio Code

ADDITIONAL INFORMATION

- **Languages:** Malay (Native), English (Proficient)
- **Soft Skills:** Problem-solving, effective communication, adaptability, teamwork
- **Development Interests:** Web and application development
- **Availability:** Open for internship or junior developer roles

PROJECTS

eTani Mobile App (Final Year Project)

- Developed a mobile application using Flutter and Firebase for agricultural management system
- Integrated ToyyibPay for online payment processing
- Integrated Google Maps API for location-based farm tracking and mapping features
- Implemented user authentication, real-time database, and cloud storage using Firebase

LunaraWear E-Commerce Website : <https://lunarawear.onrender.com>

- Developed using CodeIgniter 4 (PHP MVC Framework)
- Integrated with Supabase PostgreSQL database
- Deployed on Render cloud platform using Docker
- Implemented user authentication, shopping cart, and product management features

IoT Web System (Laravel)

- Built web system using Laravel framework with REST API integration
- Integrated IoT data communication with web dashboard
- Implemented real-time data handling and backend API services

School Resource Center Management System

- Developed responsive website using HTML, CSS, and JavaScript
- Deployed via GitHub Pages / GitHub deployment workflow
- Built admin dashboard allowing content editing and live website modification
- Implemented feature to update and push code changes directly to GitHub repository via admin interface

Payment Gateway & Invoicing System

- Developed payment system integrated with ToyyibPay
- Generated invoices and official receipts compatible with LHDN requirements
- Implemented transaction tracking and automated receipt generation
